Trans. of la Rivista [del] Combustibili (Italy) 1957,
v. 11, p. 245-259.

A method based on the preparation of mixtures composed of aromatic extracts under examination with saturated or (non-aromatic) of known structural composition, having a molecular weight of the same order, is proposed for the determination of the structural composition of aromatic extracts derived from the refining of lubricating oils, whose high content of C, CA and H does not permit the direct application of the equations and nomographs pertinent to fractions of "normal" petroleum. The physical constants are determined and the structural composition (Chemistry--Organic, TI, v. 5, no. 7) (over)
